

Hello everyone!

Before we start

- **Figma accounts**
- Homework **presentations** and submission
- **Networking** event – **April 4, 19:30**, Kanaal
- Mentor program

Mentor program

- Each team will be introduced to their 2 mentors via email
- **Each team has 1-2 hours per mentor weekly, use your time with them wisely. Prepare questions.**
- Set up time to meet with each of your mentors as a team **in the next two weeks**
- Contact them in your **Buddy Group channel** in Teams

[Guide for working with Mentors](#)

Strategy (pt 1)

Upskill UX/UI Design

Agenda

- Intro to **UX strategy**
- Understanding **business goals**
- **Stakeholder interviews** for setting business goals
- **Competitive analysis** for researching your competition

Intro to UX strategy

UX process

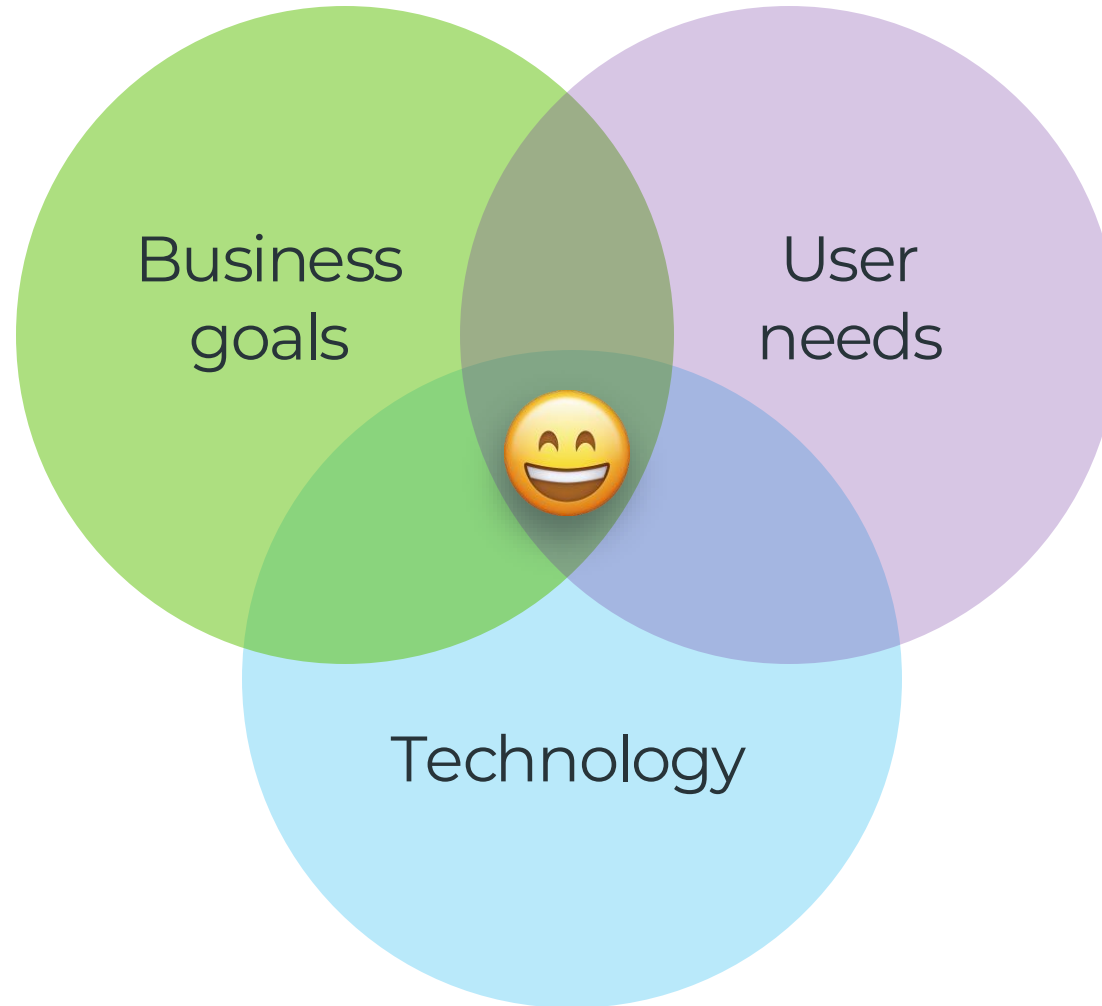

The elements of UX

What do the user and
the business need?

The Intersection Point

What is UX strategy – by NN/g

A UX strategy is a **plan of actions** designed to reach an improved future state of the organization's user experience over an established period of time.

A good UX strategy should help teams **decide what problems to solve** and **what features should be prioritized**.

What is UX strategy – In Simpler Terms

UX strategy is deciding **what** to build, **why** it matters, and **how** it will create value for **users** and the **business**.

A good UX strategy should help teams **decide what problems to solve** and **what features should be prioritized**.

What is UX strategy

UX strategy is deciding **what** to build, **why** it matters, and **how** it will create value for users and the business.

- **User needs** → what people actually want
- **Business goals** → what the company needs
- **UX strategy** → how will we achieve that

What is UX strategy

- **User needs** → what people actually want
- **Business goals** → what the company needs
- **UX strategy** → how will we achieve that

What is UX strategy - Simple Example

- **User needs** → what people actually want
- **Business goals** → what the company needs
- **UX strategy** → how will we achieve that

Company / Product: Food delivery app

- **User need:** “I want to choose food quickly”
- **Business goal:** Increase order frequency
- **UX strategy:** Reduce decision time using personalized recommendations

That's a lot of business..

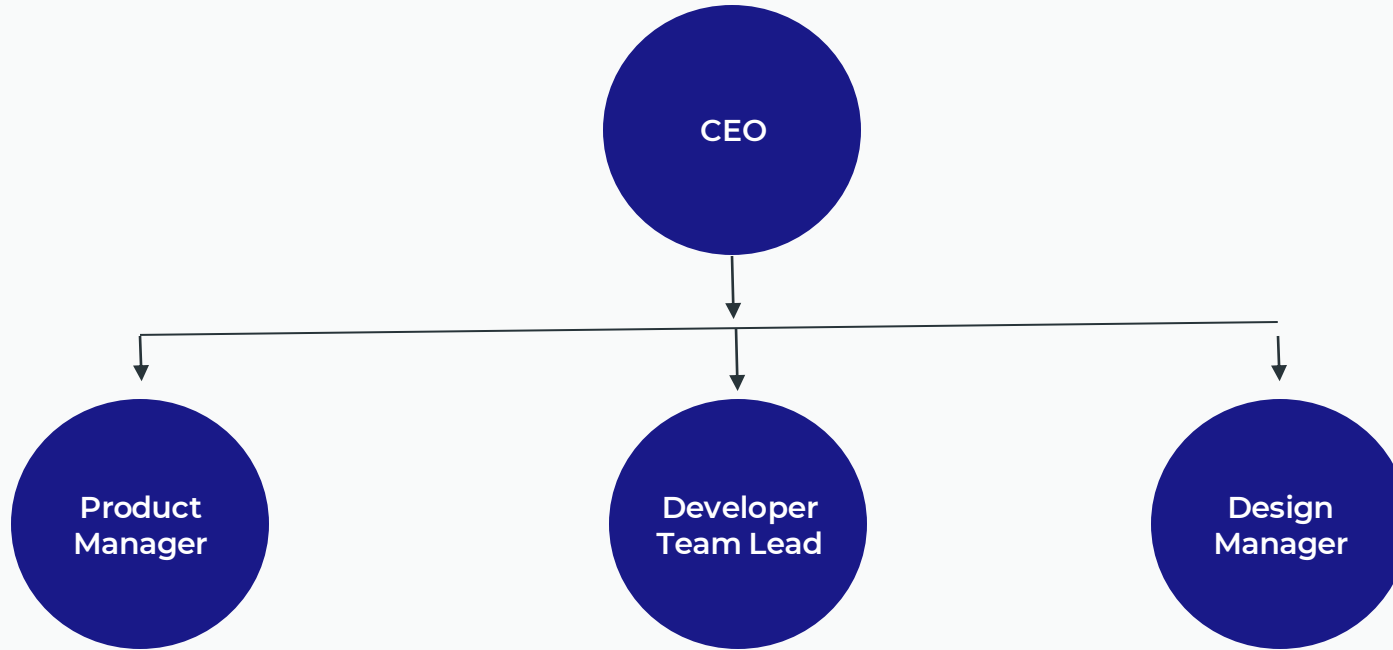

That's a lot of business..

The Team & The Product

UX happens in collaboration, not in isolation.

Components of UX strategy

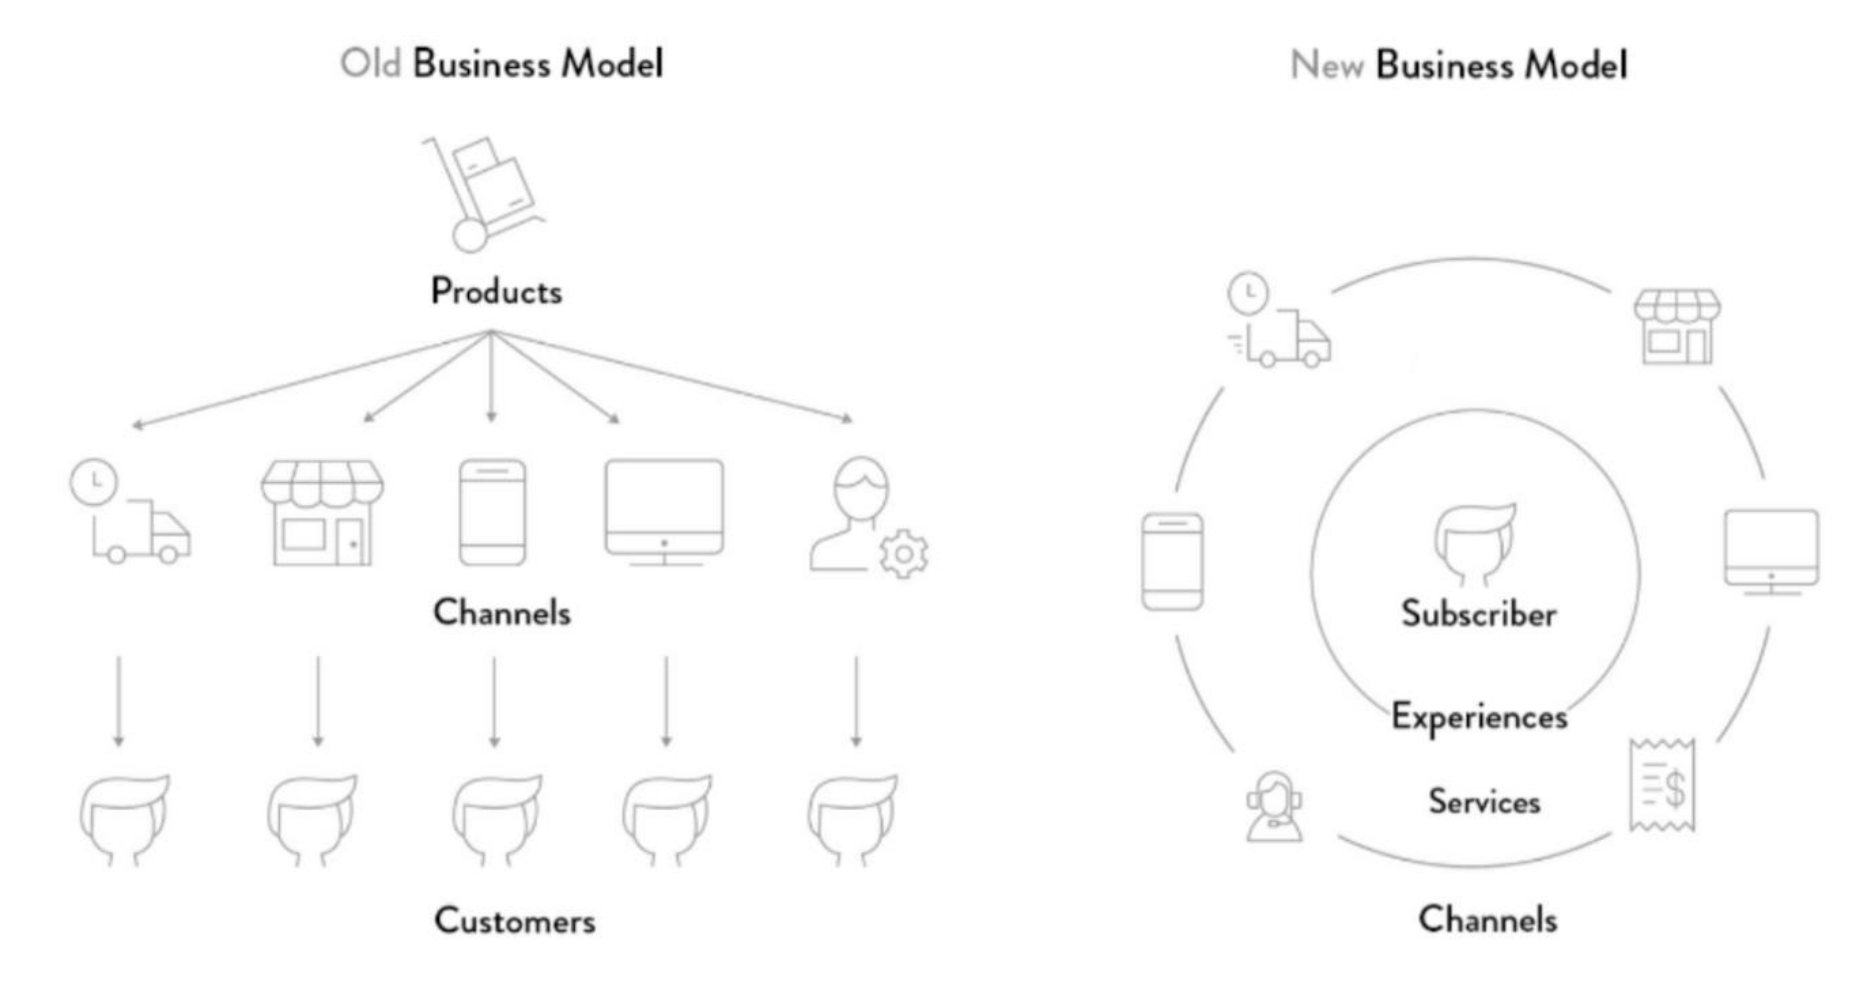

Business goals

What are business goals

Specific objectives that a company aims to achieve within a certain timeframe. They provide direction, help measure success, and guide decision-making at all levels of the organization.

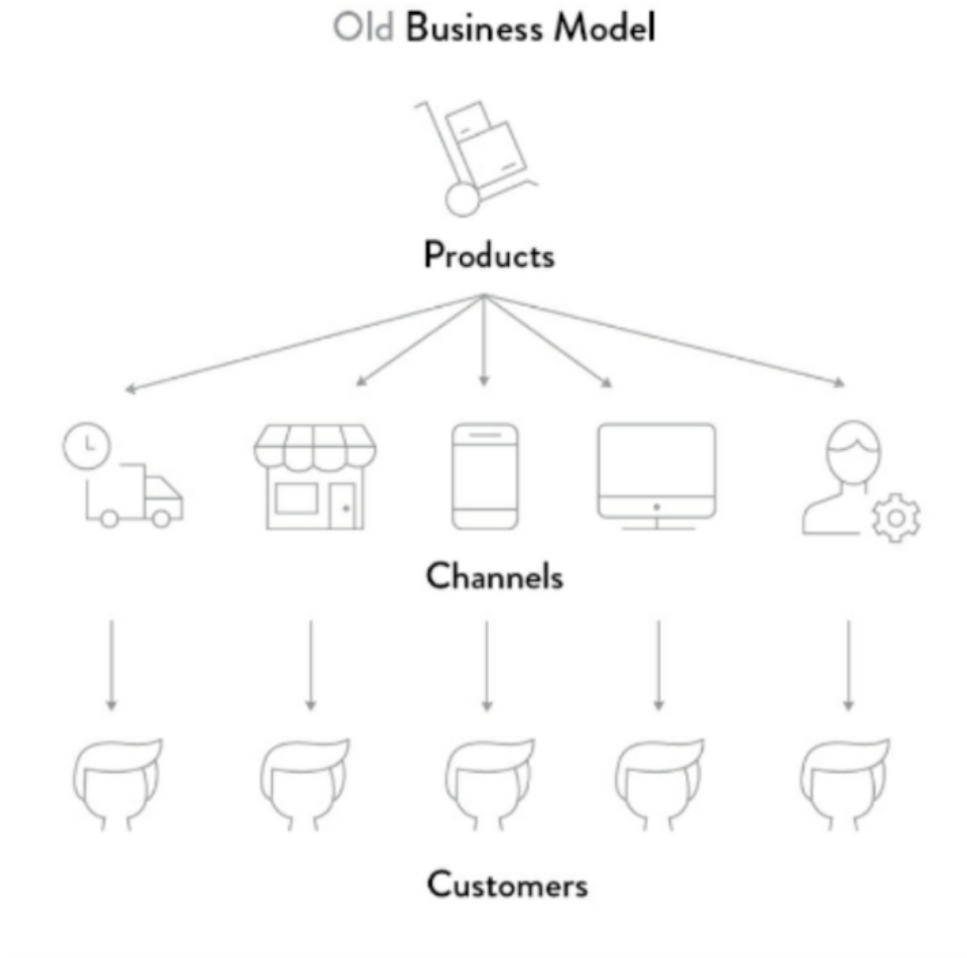

- **1. Financial**
Revenue, profitability
Ex: Increase revenue by 20% this year
- **2. Growth**
Expansion and market share
Ex: Expand to 2 new markets (e.g. Germany, UK)
- **3. Customer-Focused**
Enhance customer experience and satisfaction
Ex: Reduce customer support complaints by 30%
- **4. Operational**
Improve efficiency and internal processes
Ex: Reduce onboarding time from 5 days to 2 days
- **5. Marketing**
Brand awareness, engagement, and lead generation
Ex: Increase website conversions from 2% to 4%

User-centered business model

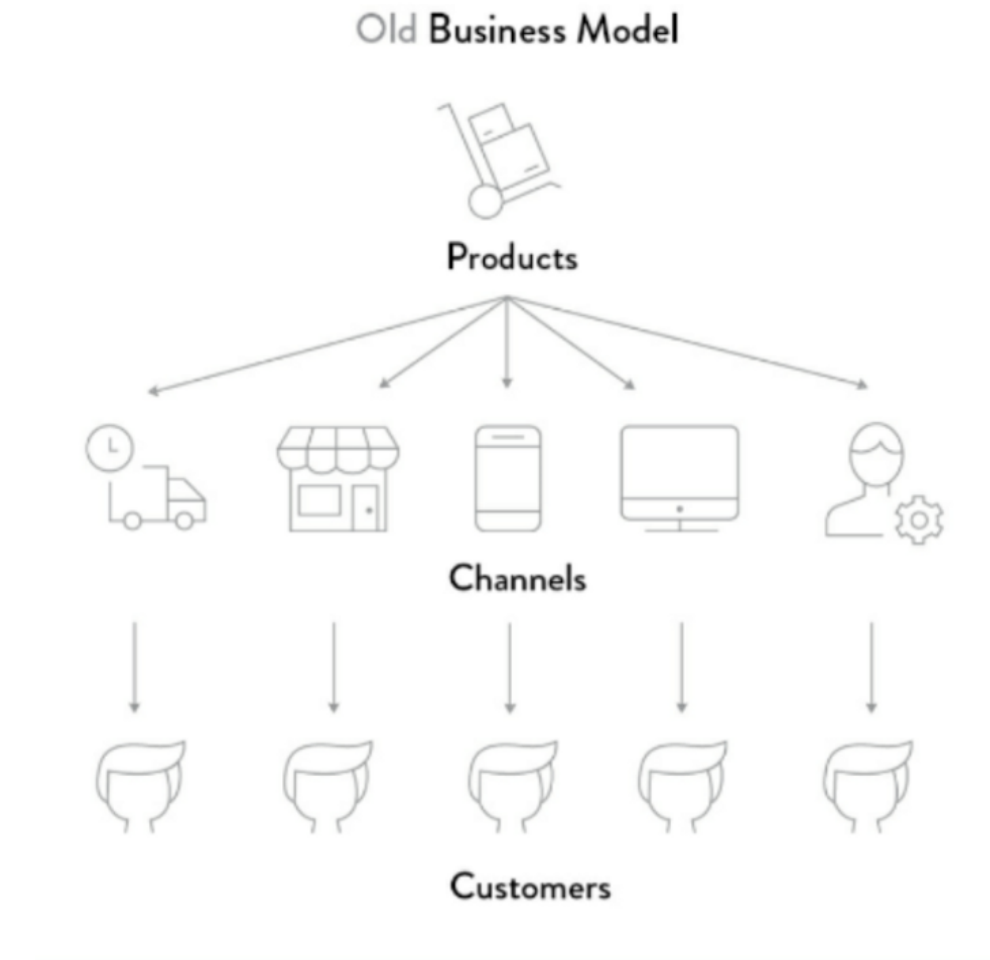

Old Business Model - Linear

Companies used to focus on selling products.

Old Business Model - Linear

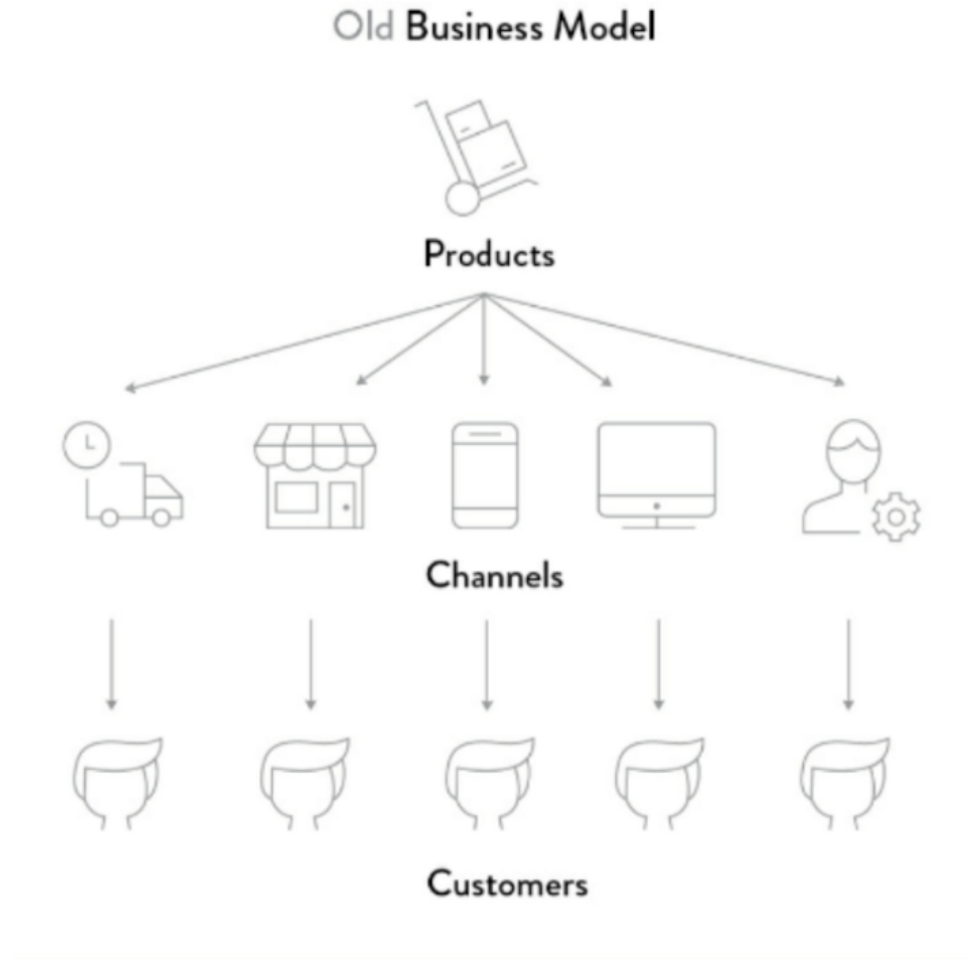

Companies used to focus on selling products.

Example:

Store sells tiles and expects you to figure it out.

Old Business Model - Linear

Companies used to focus on selling products.

Example:

Store sells tiles and expects you to figure it out.

Example:

A company builds a fitness app and pushes everyone to use it the same way.

New Business Model - Circular

Now they focus on designing the entire user experience around the product.

New Business Model

New Business Model - Circular

Now they focus on designing the entire user experience around the product.

Example:

Store helps you visualize tiles in your kitchen before buying.

New Business Model - Circular

Now they focus on designing the entire user experience around the product.

Example:

Store helps you visualize tiles in your kitchen before buying.

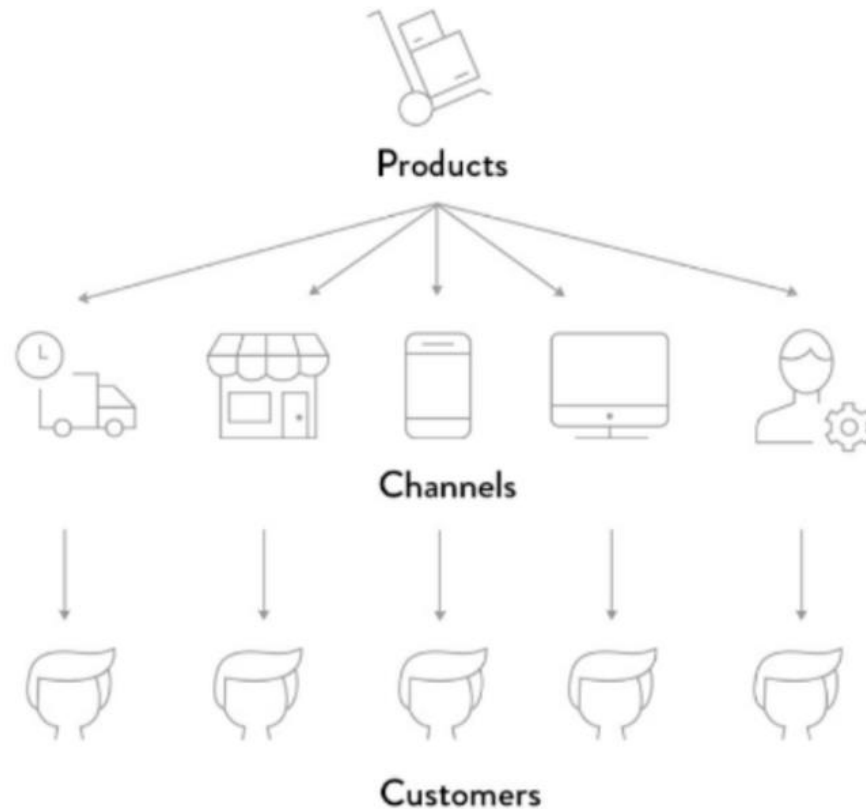

Example:

The app adapts workouts based on your level, goals, and behavior.

User-centered business model

Old Business Model

Example:

A company builds a fitness app and pushes everyone to use it the same way.

New Business Model

Example:

The fitness app adapts workouts based on your level, goals, and behavior.

Common business goals + KPIs

- Make money (grow)
 - Increase conversion rate
 - Increase engagement
 - More sales or leads

Common business goals + KPIs

- Save money (optimize)
 - Reduce churn (lower rate at which customers leave your product)
 - Increase retention (how long customers stay loyal to your product or service)
 - Improve net promoter score (NPS)(will you to recommend)

Common business goals + KPIs

- Increase brand awareness
 - Increase email subscribers
 - Increase social media followers
 - Increase social media shares

Design and Business Goals - Example

Stakeholder interviews

Researching business goals with stakeholder interviews

Illustration by [UXDesign.cc](https://uxdesign.cc)

What is a Stakeholder?

Stake

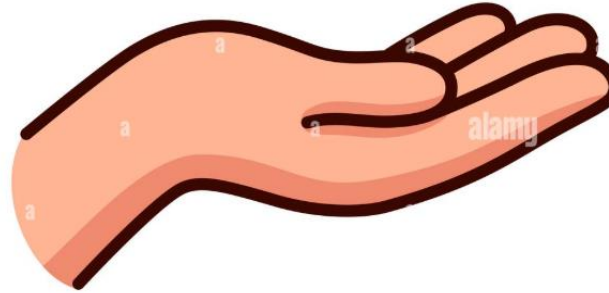

What is a Stakeholder?

Stake

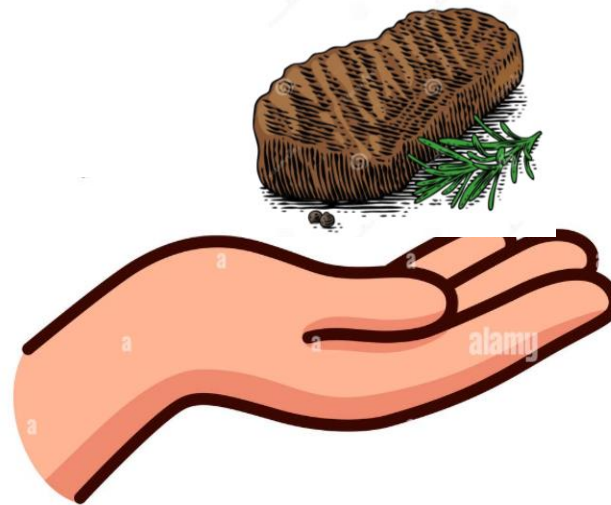

Holder

What is a Stakeholder?

Stakeholder

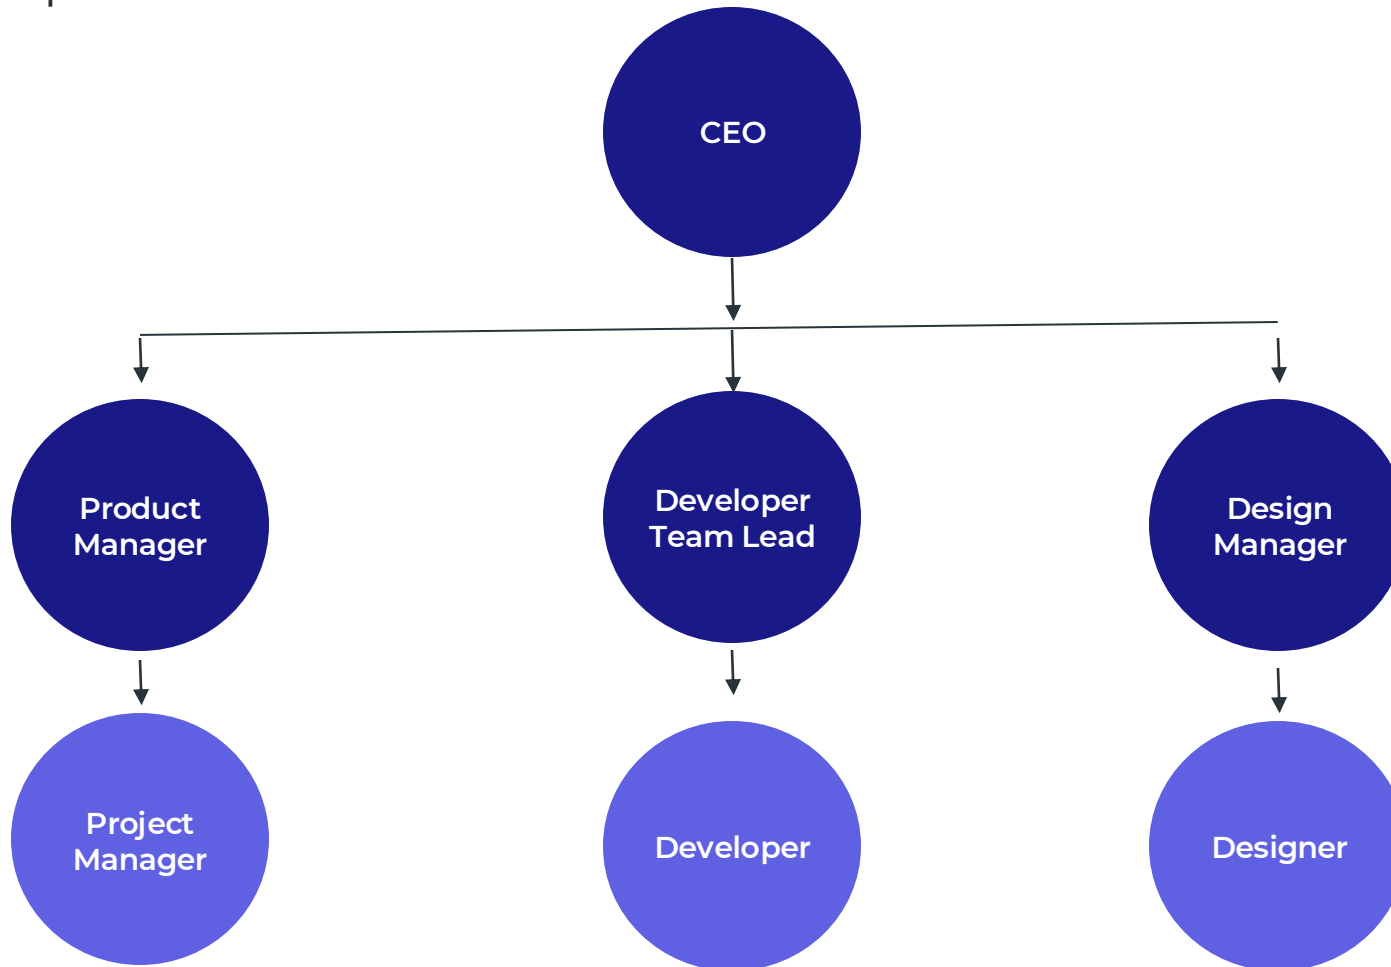

What is a Stakeholder?

A stakeholder is anyone who influences the product or is responsible for part of its success.

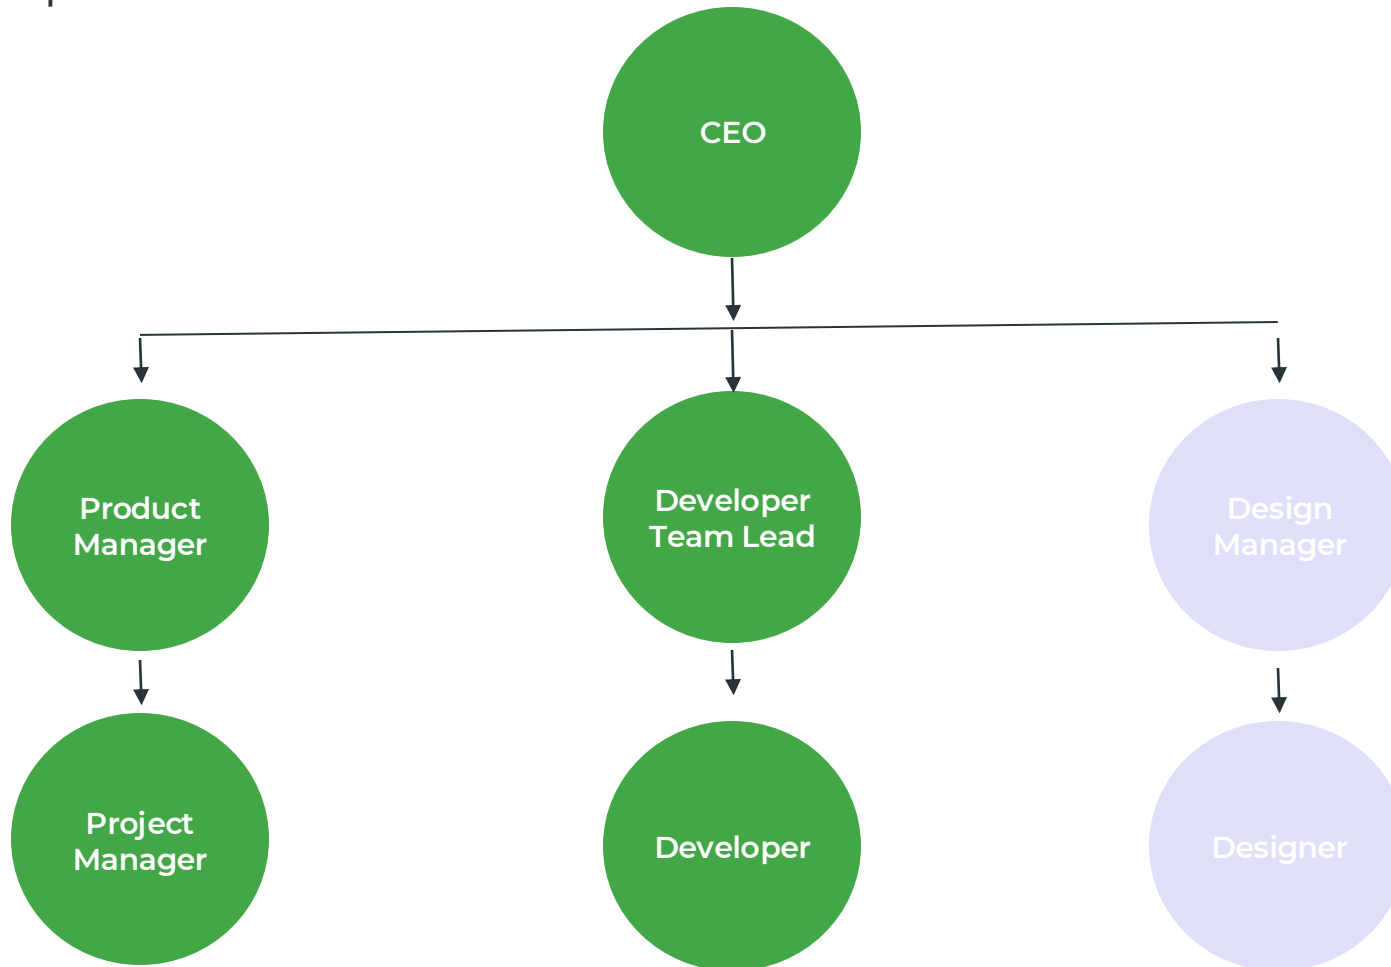

What is a Stakeholder?

A stakeholder is anyone who influences the product or is responsible for part of its success.

What is a Stakeholder?

A stakeholder is anyone who influences the product or is responsible for part of its success.

What's a Stakeholder?

CEO

The CEO

- Sets company goals
- Decides where the company is going
- Cares about revenue, growth, positioning

Product
Manager

The PM

- Defines priorities
- Decides what features go in or not
- Responsible for product success

Developer
Team Lead

The Dev Lead

- System architecture
- Technical decisions
- Performance, scalability, security

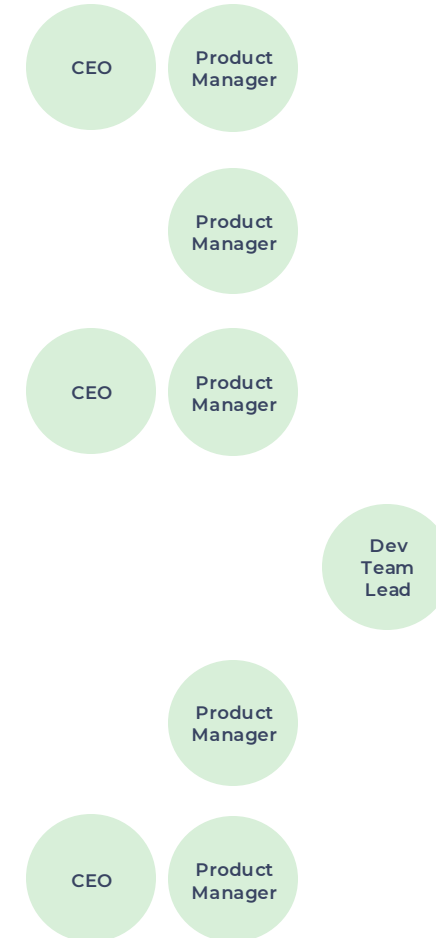

What are stakeholder interviews

- One-on-one conversations with people who have a vested interest in the success of the product
- Provide valuable insights
- Guide the flow: business goals, technical constraints, usability problems, and more

1. What do we need from Stakeholders?

- What are the short- and long-term **business goals**? - CEO / PM
- Who are the **users**? - PM
- Who are a few **major competitors**? - CEO/PM
- Are there any **technological limitations**? - DEV
- What are a few **product concerns**? - PM
- What is **definition of product success**? - CEO / PM

2. Find stakeholders

- **Locate key figures** and extract as much useful information from them
Ex: The Company Structure
- Stakeholders who represent **different sectors** of the company
Ex: Marketing, Finance, Development, C-Level
- Collect information about **goals, problems, expectations**
- Determine exactly what the **design process** should encompass

3. Prepare questions

- **Open-ended questions** provide greater insight
“What are the main goals for the product right now?”

3. Prepare questions

- **Open-ended questions** provide greater insight
“What are the main goals for the product right now?”
- Interview in a **conversational direction**
“You mentioned conversion is low - can you tell me more about that?”

3. Prepare questions

- **Open-ended questions** provide greater insight:
“What are the main goals for the product right now?”
- Interview in a **conversational direction**:
“You mentioned conversion is low - can you tell me more about that?”
- **Ask clarifying questions**, even for answers that appear obvious:
“What do you mean by ‘improve experience’?”

4. Document and analyze responses

- Start by **analyzing individual interviews**, and then move on to examining them collectively
- Write up a **report** to summarize everything
- Try organizing your research findings into categories:
 - Business
 - Users
 - Problems
 - Fears
 - Motives
 - Competitive advantages
 - Solutions
 - Alternatives
 - Unique value propositions

Competitive analysis

What is competitive analysis

- **Identify** all current competitors
- **Evaluate** their strategies
- Determine their **strengths and weaknesses** relative to those of your organization's product
- Cross-check findings with user feedback

Quick Live Session

Why do competitive analysis

- How is the competition doing it?
- What is the competition doing right?
- What is the competition doing wrong?
- Why should customers come to our product instead?

	Udemy	Skillshare	Domestika	BWA	Skill Academy
🔗 Link Platform	https://www.udemy.com/	https://www.skillshare.com	https://www.domestika.org/	https://buildwithangga.com/	https://www.skillacademy.com/
📦 Product	Udemy is an online learning and teaching marketplace for marketing, design, programming and more	Is an American online Learning community for people who want to learn from educational videos. Courses, which are accredited, are available via sbuscription. The majority of courses focus on interaction rather than lectures, with the main objective of learning by completing projects	Domestika is the largest community for creatives. Learn and share from anywhere with online courses taught by the best professionals	BuildWith Angga is a technology company that help people to learn high quality IT at a more affordable cost	The best online course/class site to improve technical & soft skills in various fields for students, professionals and the general public
📋 Product Features	• Video Lectures • Details Class (Sylabus) • Download Certificate • Quizzes • See reviews • Direct Message Your Mentor • Login by Google / FB • Change language • Apply Teacher • Class Requirement • Class Review • Class Category • Class Recommendation • Search Class	• Free classes • Group classes • Detail Class • Learning by support • Class Recomendation (popular, best sale in this month) • Class Category • Online Support • User dashboard (my class, check progress class) • Showcase Project • Wishlist Class • Search Class • Watch history • Filter class by class length or status class progress/ completed	• Class Description • Follow mentor to get new class notification • Personal branding account (Showcase project) • Chatting with other user • Class category • Class Suggestion • Class review • Certificate download • User Dashboard (my class, class progress) • Search Class • Demo Preview	• Learning Progress • Student Dashboard • My Class • Community (Showcase) • Search Page • Live Chat (CS) • My Certificate • Flash Sale • Study Roadmap • Class Catalog • Download material class • Study Points • Class Preresquisite • Class Level • Search Filter • Demo Preview	• Search Bar • Class Categories • PRAKERJA • My Class • Exam • Learning Progress • Help • Flash Sale • Grading Materials • Content List • Auto Checkpoint • Rating and Review • Edit Profile • Category explore • Demo Preview
📈 Product Strength	• Doesnt have expiration date • Over 183,000 courses on a wide variety of subjects • join any available course whenever you want	• Has a wishlist feature for the class you want to buy • Online support that can help students if there are problems • a large collection of classes with various categories of softskills or hardskills	• Growing community - Each course has its own forum for participants to discuss lessons or ask questions. • Not only class, but users can build their portfolio like a social media	• Not only focusing on class, but there are other products such as template, study guides • Have Study Roadmap / Career • Flexible for subscription and One time buy	• Support payment with prakerja account • Exam before complete the class • Variation class type (Sofskill & Hardskill) • Complete and clear class categories • Various Payment Choices
📉 Product Weakness	• Who is an "expert"? Udemy allows virtually anyone to create a course	• Can only be paid using a credit card or paypal • New users must subscribe, then they can be redirected to the homescreen	• For classes with the language of instruction (Swedish, Spanish & Italian) can't be changed to English dubbing • Need to pay more for certificate	• Bad navigation when accessing user dashboard • Inconsistent hyperlink type	• There is no downloadable materials • There is no Cart or Wishlist •

Value proposition

Value proposition

A statement that explains how a product solves a problem or meets a need.

It's why a customer should choose it.

Value proposition template

Template

For _____ (target customer)

who _____ (need, struggle or opportunity),

our _____ (product described)

offers _____ (benefit).

Example

For **busy professionals**

who **struggle to find time for daily meditation,**

our **meditation app**

offers **quick, guided sessions that fit into any schedule.**

Summary

- A solid UX strategy serves as the foundational structure for any project, guiding it towards success.
- Business goals are the core of strategy, they need to be researched, balanced and prioritized.
- As Designers - always defend the user's needs.

Tanya Beloreshka / Merkle

Homework

Homework: **Intro + Strategy**

1. Team name and slogan (reminder)
2. Start creating your **strategy** document
3. Conduct a **competitors analysis**

Submit by 6 pm **Monday (March 30)**

Presentations: **March 30, April 1**

Strategy document (template)

Strategy

- What is the **value proposition** of your product?
- What is the **vision** for the product?
- What may be your **users' pain points** and problems that you will solve (what are your **goals**)?

Business Goals and KPIs

What are the **measurable outcomes** of the product (3-5 goals)?

Users

Who are the **targeted users** and why (assumptions)?

Value Proposition

Our team was responsible for developing the experience of the first version of the mobile app/website, specifically to allow users to accomplish three primary tasks:

- **Onboard** - enable users to seamlessly create an account and set their compatibility preferences;
- **Offer a Ride** - users can earn money by offering a ride without having to drastically change their commute;
- **Find a Ride** - users can set up a recurring carpool with a driver with similar preferences, routes, and schedules;

Usability & Goals

For passengers:

- much better experience than conventional taxis;
- assure safe commute without drastically changing their routine;
- make the interface light-hearted and the copy pleasant and conversational in tone;

For drivers in the system:

- mostly pleasant work, modest income;

For other users of the road:

- decreased demand for parking;

For the city:

- widened transportation options;

Vision Statement

- To be Bulgaria's leading carpooling platform – a trusted community of thousands of drivers and passengers.
- To connect people looking to travel with drivers heading the same way, so they can travel together and share the cost.
- We aim to be the go-to marketplace for shared road mobility. Affordable, convenient and user-friendly, wherever there's a road, there's a Carpool car.

How to measure success

Engagement KPI's:

- To increase the retention rate
- To increase the active users (MAU vs. DAU)
- To increase stickiness (DAU/MAU)
- To decrease the churn rate

Revenue-focused KPI's:

- To increase average revenue per user (APRU) – to measure viability
- To decrease the customer acquisition cost (CAC)
- To decrease the cost per acquisition (CPA)
- To increase return on investment (ROI)
- To decrease cost per instal (CPI)

VALUE PROPOSITION

- Reduce the traveling time for short distances by 30%.
- Make people more healthy and happy with less cars in the city.
- An alternative way to discover and explore the city and parts of it.
- A much cheaper and more accessible way to travel compared to an automobile.
- Doesn't require a driving license.

VISION OF PRODUCT

- Expand the city public transport range as an alternative to cars and a good connection to existing public transport as subway, bus, trains and places of interest.
- Independent transport system for short distances with capabilities for fast and reliable transport.
- Increase distance and mobility for people with needs.
- Help local businesses optimize the time and needs of employers.

GOALS

- Connect your home to public transport, workplace, school and other places of interest.
- Reduce the use of cars in the city from 700 for 1000 people to 100 for 1000.
- Reduce noise pollution.
- Reduce atmospheric aerosol particles below 25 µg/m³.
- Reduce carbon monoxide pollution.

WHY PEOPLE WOULD USE IT?

- Save time, money and be healthy.
- Contribute to the fight with climate change.
- Be part of building the city of the future with 0 emissions.
- Much safer and efficient way of transport.

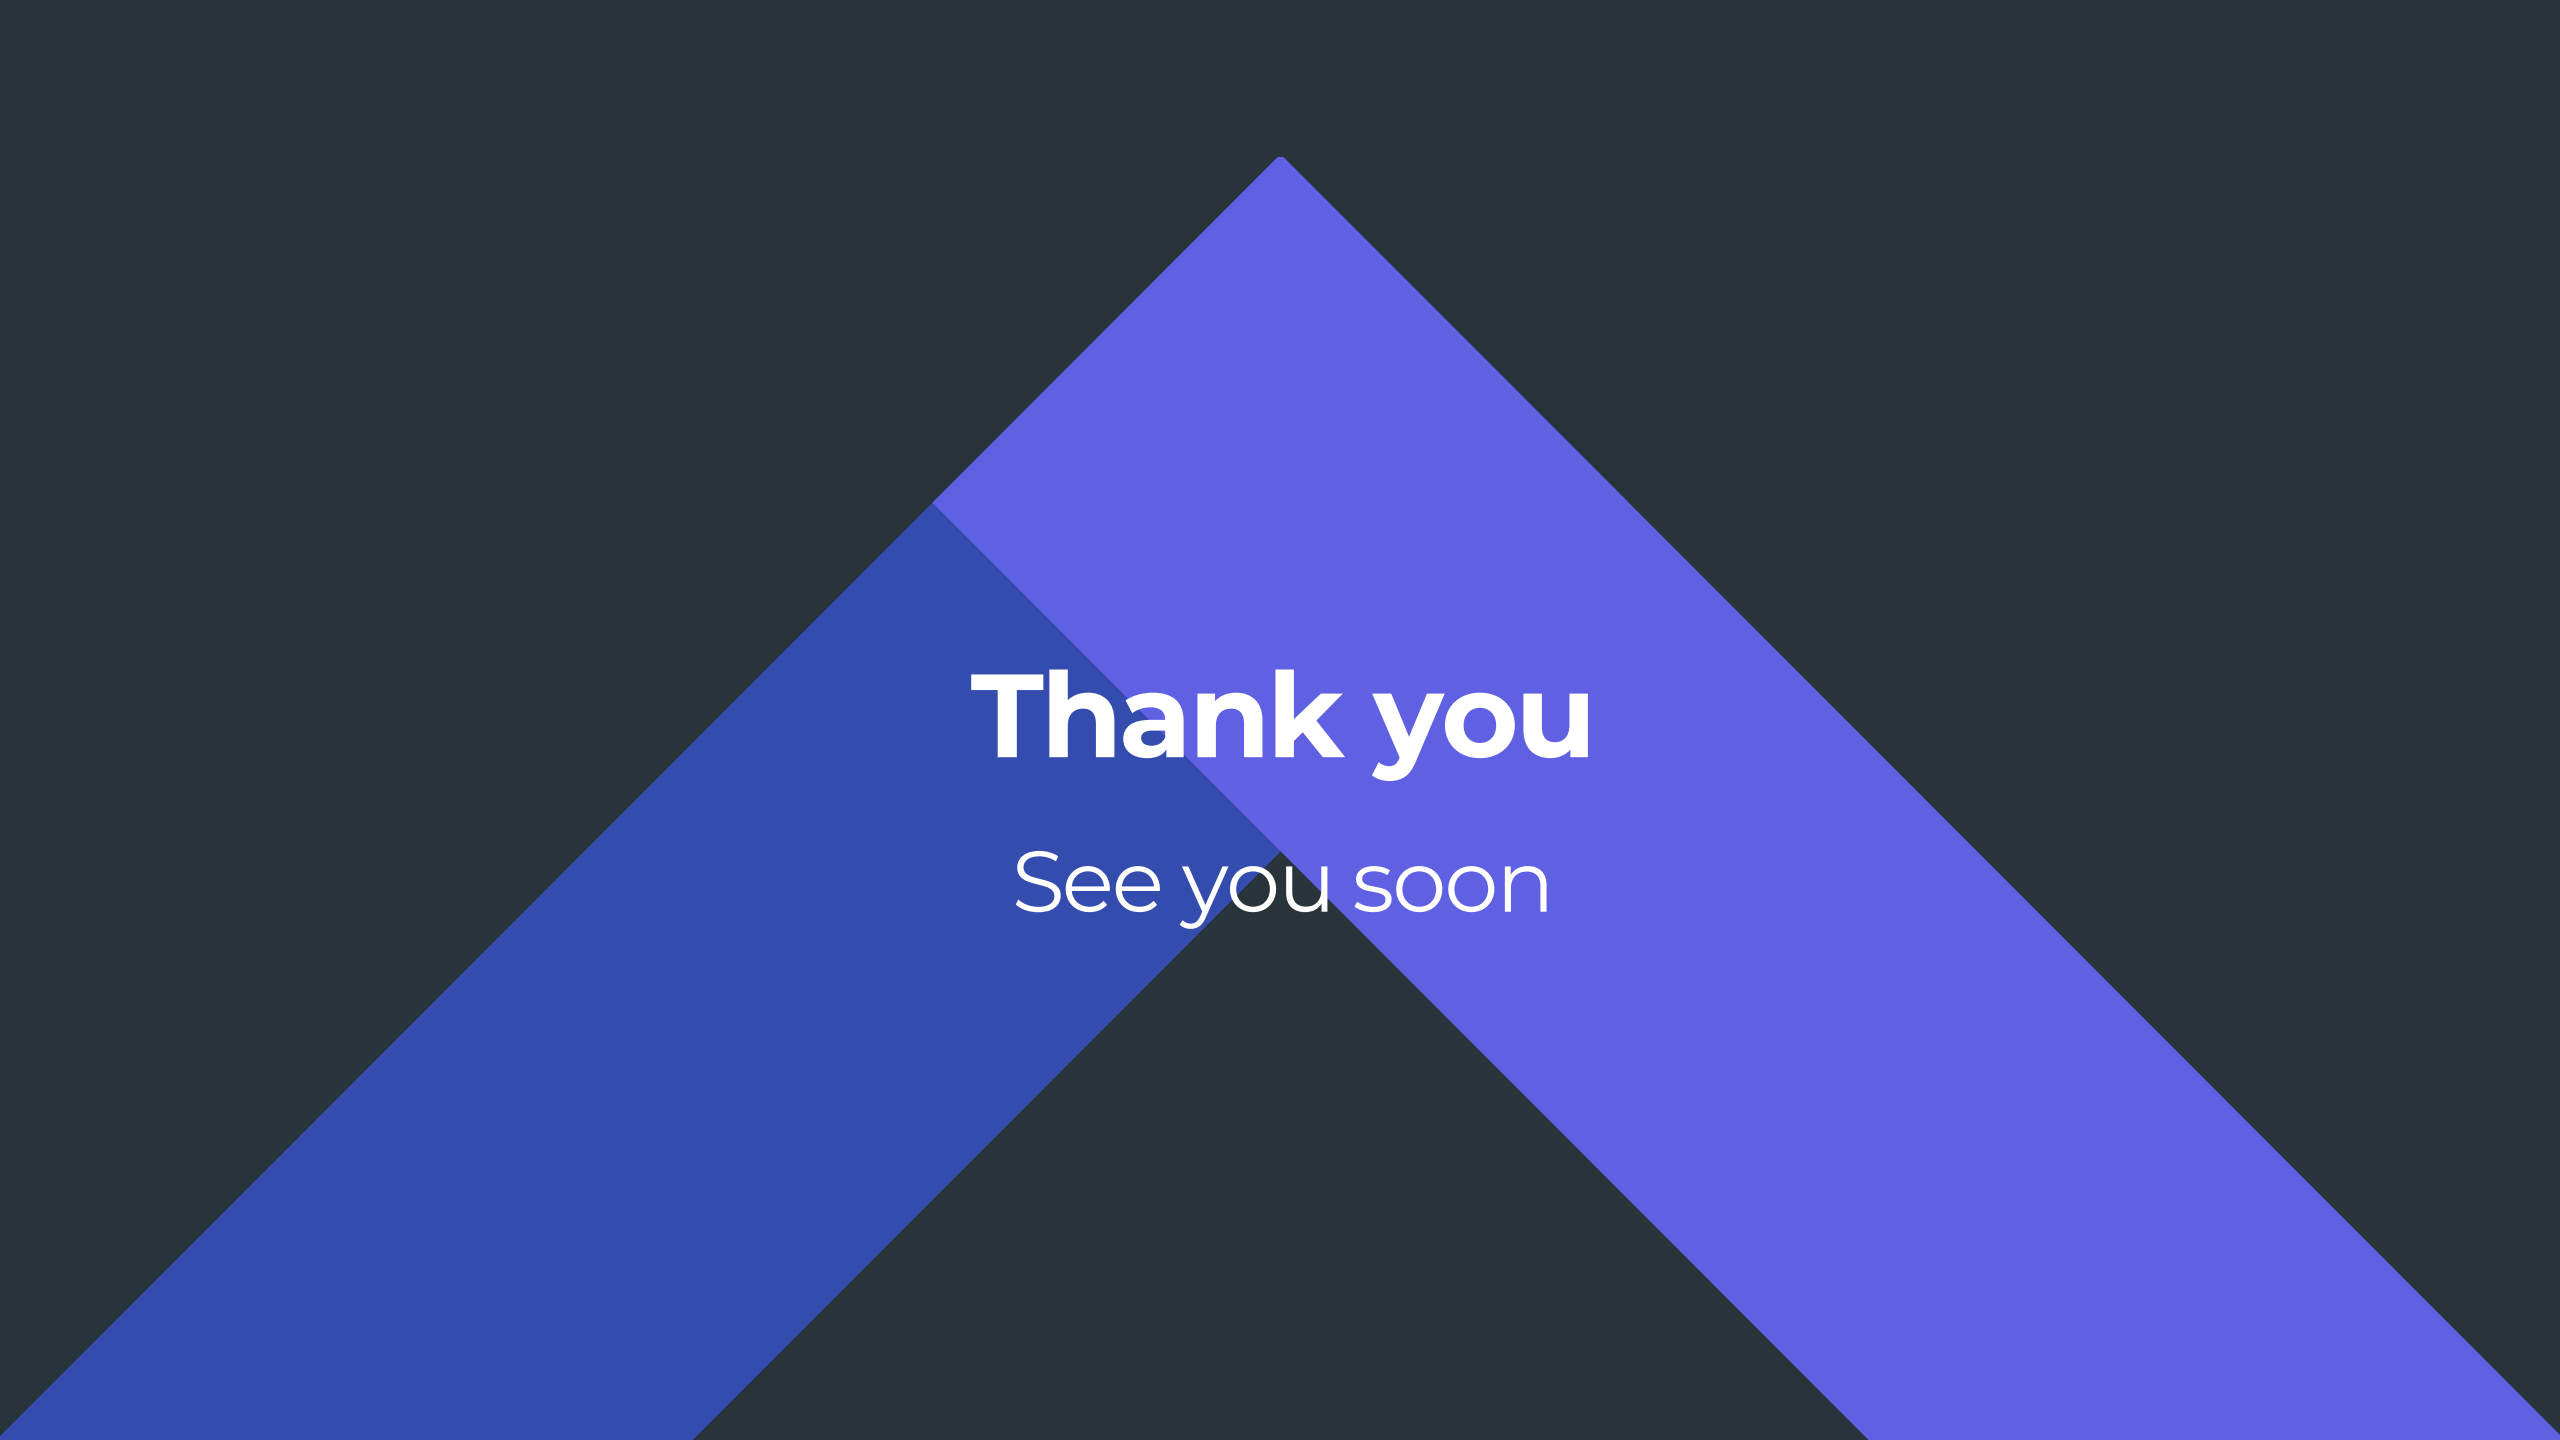

WHY PEOPLE WON'T USE IT?

- Age restriction.
- Too old to ride a bike.
- Can't ride a bike.
- Bad infrastructure.
- Don't feel safe riding in traffic.
- Bad weather.

What's next

30 March, **18:00 - 21:00**
